

# Bathroom Design Process

a walk through

submitted by

# BATH BARN

(see ad on p. 22)

At the Bath Barn, we will walk you through the design process of creating a bathroom that is just right for you. Here we created an open, spacious bathroom with a light, brightly colored floor and walls. The dark cabinetry grounds the space and adds some depth to the design. The use of black and gold metals throughout the bathroom adds interest. A general style rule when mixing metals is to use each metal more than once. Here we have gold knobs and faucets complimented by black lights and mirrors.
