here are many benefits to an outdoor kitchen. It reduces energy usage inside your home and keeps the heat outside where it belongs. It's also an excellent place to entertain and host a more extensive gathering than you may have been able to inside.

Having an outdoor kitchen is also handy for other things, not just entertaining and making food. If you are a crafter or prefer to do things outside, making your handmade soaps or candles in your outdoor kitchen can keep those scents and fumes outside, eliminating the need to air out the house every time you make a new batch!

And, of course, you can customize your outdoor kitchen with all the features you want to suit your needs and desires. If you love entertaining, you may wish to have a fire pit next to your outdoor bar. Or maybe you're hoping for something smaller and more intimate, so you opt for a built-in grill and a sink next to one another.

Whether you'd like to add a few bells and whistles or want to create the ultimate outdoor kitchen in your

own backyard, there are tons of amenities to bring your design to life. Here are some ideas to help spark your creativity and spice up your outdoor kitchen.

**Built-In Grills.** If you don't like to roll your grill out of the garage to use and then wait until it cools down to put it away again, you might love the idea of a built-in grill for your outdoor kitchen! Take your grilling experience to a new level with built-in luxury outdoor grills from one of our top brands. These grills are exceptionally easy to use and produce incredible food, but they are also easy to clean, making them the perfect choice for an outdoor kitchen.

**Outdoor Pizza Ovens.** Everyone loves a good pizza! Let your guests put together their own pizzas for an easy dinner, especially when you have a group of friends over for a casual game night or a family gathering with a bunch of little ones. Make any night a pizza night with a built-in outdoor pizza oven right in your own backyard.

**Cabinetry and Storage.** Worried about where you'll keep your grill cleaners? Concerned about keeping your favorite spatula out of the dishwasher as it

deserves to be carefully hand washed after each use? We have storage space options for everything! Keep what you need and love most close at hand with custom stainless steel cabinetry, drawers, and more.

**Custom Countertops.** It's not an outdoor kitchen without some beautiful counter space for food prep! Give yourself the area you need to slice, dice, mince, and serve your favorite dishes in style. With a custom countertop for your patio kitchen, outdoor kitchen island, or outdoor grill island, it's difficult not to want to spend more hours outdoors cooking new recipes.

**Built-In Sink.** Rinse vegetables, draw a pot of water, or clean up messes quickly with an outdoor sink and washing station. The added convenience means you don't have to flit back and forth between inside and outside. Stepping away from your grill for just a moment too long can mean the difference between a perfectly seared steak and an overdone one.

**Fire Pits.** There's nothing quite like a good conversation around a fire,

laughter under the stars, and hanging out with friends or family after a particularly satisfying meal. Add a fire pit to your outdoor kitchen to chase away the chill on cool evenings for more moments with family and friends, and you'll be able to enjoy making these memories and more.

**Outdoor Bar.** Maybe you're the type who loves to experiment with new drinks. Or perhaps you love hosting parties where your guests expect to be wowed in both the food and drink departments, and you've always dreamed of a backyard bar and grill setup.
