GR Mitchell

BUILDING SUPPLIES • ARCHITECTURAL MILLWORK • CABINETS

(see ad on p. 23)

THE GALLERY

Supplied by GR Mitchell: Lumber (various framing and structural), custom millwork to match existing details in the home, trim, shiplap, kitchen and bath cabinetry, windows, interior doors, decking materials (not shown), etc.

Seamlessly blending your existing space with a new addition is a challenge for many projects, but with the right plan and the right materials this can be an easily achievable goal. This homeowner had a vision that included an updated office, dining area and new first floor owner's suite, plus a large addition containing a spacious kitchen and a beautiful living space to accommodate their blended family.

GR Mitchell has been supplying homeowner's and their professional remodeling contractors for over 50 years. The professional on this project, **Evergreen Custom Carpentry**, expertly demonstrated their remodeling skills while they executed on this family's design ideas. A clean, contemporary look was combined with vintage elements (rustic ceiling fan, recycled pantry door, etc) to give this remodel a look that both complemented the original design of the home while adopting aesthetics and functionality that delighted the homeowner.
